WELCOME ADDRESS

On behalf of the Continuous Professional Development Committee of the Saudi Spine Society, it is our pleasure to welcome you all to the Complications Forum which will be held on January 12, 2019 in Dammam, Saudi Arabia. This event is a continuation of the successful academic events, conferences, symposia and workshops that the Saudi Spine Society has been conducting over the past two years.

Our forum is the first of its kind in the region. It will focus on different complications which spine surgeons and spine practitioners may encounter during their practice. The forum will be divided into multiple sessions that cover different spectrums of complications such as infections, implant failures, neurological complications, and many other perioperative complications as well as non-surgical complications. Senior surgeons and spine practitioners will share their experience and exchange thoughts in the way of addressing such complex situations. At the end, there will be a dedicated interactive session with lawyers who are experts in the medical field. We are sure that it would be of a great value to all attendees.

At last, our thanks to the faculty for their valuable contribution, and we are looking forward to have a rich forum, discussing high yield spine pathology and interesting cases that will exceed your expectations.

Dr. Khaled Al-Assiri
Chairman CPD Committee
Saudi Spine Society

Prof. Abdullah AlOthman
Chairman
Complications Forum

Forum Co-Chairman

Dr. Saud AlHammad

King Fahad Specialist Hospital, Dammam
